AmeriCorps State and National Performance Measure Requirements

All applications must include at least one aligned performance measure (output paired with outcome) that corresponds to the proposed primary intervention. This may be a National Performance Measure or an applicant-determined measure depending on the program's theory of change. Applications may also include National Performance Measure outputs without associated outcome(s) provided that the output measures a significant program activity. These output-only measures do not fulfill the requirement for an aligned performance measure, but may be selected in addition to the aligned measure(s).

All performance measures must reflect significant program activities whose outputs and outcomes are consistent with the applicant's core theory of change. Applicants are not expected to have performance measures for every program activity. AmeriCorps does not require applicants to use National Performance Measures but expects them to do so if National Performance Measures reflect key outputs and/or outcomes of the theory of change. Applicants may not create applicant determined outputs or outcomes that duplicate existing National Performance Measures.

All performance measures, including output-only measures, must be associated with one or more interventions (service activities). Applicants are expected to use the system-defined intervention categories if they appropriately represent the applicant's program activities. Applicants may not create user-defined intervention labels that duplicate existing intervention categories.

Environmental Stewardship

Strategic Plan Objective	Selection Rules		Interventions
	Outputs	Outcomes (if applicable)*	
At-Risk Ecosystems	EN4: Acres of parks or public land treated	EN4.1: Acres of parks or public land improved	Fire Mitigation Flood Mitigation Invasive Species Removal Debris Removal Plant Establishment Climate Change Intervention
	EN5: Miles of trails or rivers treated.	EN5.1: Miles of trails or rivers improved	Trail Creation Trail Remediation Stream Remediation Fire Mitigation Flood Mitigation Invasive Species Removal Debris Removal Plant Establishment Climate Change Intervention
Energy Efficiency	EN1: Number of housing units or public structures weatherized or retrofitted to improve energy efficiency	EN1.1: Number of housing units or public structures with reduced energy consumption or reduced energy costs	Weatherization Retrofitting Climate Change Intervention
Awareness & Stewardship	EN3: Number of individuals receiving education or training in environmental stewardship and/or environmentally-conscious practices	EN3.1: Number of individuals with increased knowledge of environmental stewardship and/or environmentally-conscious practices EN3.2: Number of individuals reporting a change in behavior or intention to change behavior to better protect the environment	Education/Training Service Learning Climate Change Intervention
Green Jobs	N/A (outputs may be reported as Performance Data Elements on annual Progress Reports)	N/A (outcomes may be reported as Performance Data Elements on annual Progress Reports)	N/A

*All National Performance Measure outputs may also be paired with an applicant-determined outcome instead or may be used without an associated outcome.

ENVIRONMENTAL STEWARDSHIP

Focus Area Notes

- Programs should only opt into the Environmental Stewardship performance measures if the measures reflect significant program activities aligned with the applicant’s core theory of change.
- All individuals counted under these measures must be program beneficiaries, not National Service Participants. National Service Participant outputs and outcomes should be reported in the Performance Data Elements in annual Progress Reports.
- Activities associated with these measures must be carried out by National Service Participants or by volunteers directly recruited and/or supported by National Service Participants.
- AmeriCorps encourages grantees to perform service with the greatest impact versus providing minimal impact to the highest number of acres/miles/individuals

EN1 (output)	Number of housing units or public structures weatherized or retrofitted to improve energy efficiency
Definition of Key Terms	<p>Housing unit: a single-family home (including a mobile home if permanently placed), an apartment, or a room in a group home for people with disabilities</p> <p>Public structure: Shelter, such as homeless shelter or emergency shelter operated by a nonprofit or government organization; government-owned building</p> <p>Weatherization: Modifying a building to reduce energy consumption and costs and optimize energy efficiency. Whole-house weatherization includes the installation of modern energy-saving heating and cooling equipment and looks at how the house performs as a system.</p> <p>Retrofit: An energy conservation measure applied to an existing building or the action of improving the thermal performance or maintenance of a building.</p>
How to Measure/Collect Data	Tracking mechanism that ensures an unduplicated count of units/structures that have received services

EN1.1 (outcome)	Number of housing units or public structures with reduced energy consumption or reduced energy costs
Definition of Key Terms	Housing units or public structures: those reported in EN1
How to Measure/Collect Data	Utility bill/statement, computer modeling, resident survey, or other instrument capable of measuring changes in energy consumption or energy costs at the individual unit/structure level. When possible, pre-post assessments should be utilized.

EN3 (output)	Number of individuals receiving education or training in environmental stewardship and/or environmentally-conscious practices
Definition of Key Terms	<p>Environmental Stewardship and/or environmentally conscious practices: Organized efforts to teach about how natural environments function and, particularly, how human beings can manage their behavior and choices in order to live sustainably within those environments.</p> <p>Education or training: substantive engagement of individuals with a specific education goal in mind. Cannot consist solely of mass dissemination of information such as email blasts, social media posts, or distributing pamphlets.</p>
How to Measure/Collect Data	Tracking mechanism that ensures an unduplicated count of individuals that have received services

EN3.1 (outcome)	Number of individuals with increased knowledge of environmental stewardship and/or environmentally-conscious practices
Definition of Key Terms	Individuals: those reported in EN3
How to Measure/Collect Data	Survey, test, or other instrument capable of measuring changes in knowledge at the individual beneficiary level. When possible, pre-post assessments should be utilized.

EN3.2 (outcome)	Number of individuals reporting a change in behavior or the intent to change behavior to better protect the environment
Definition of Key Terms	Individuals: those reported in EN3
How to Measure/Collect Data	Survey, interview, or other instrument capable of measuring changes in behavior at the individual beneficiary level. When possible, pre-post assessments should be utilized.

EN4 (output)	Number of acres of public parks or other public and tribal lands that are treated
Definition of Key Terms	<p>Public parks: Park/recreation areas that are designated by national, state, city, or county governments (not trails or rivers; see EN5)</p> <p>Other public lands: Other publicly owned lands; land owned by nonprofits for public use or the public good (such as land conservancies); and public easements</p> <p>Tribal lands: Same meaning as imparted by the definitions of “Indian Lands” and “Indian Tribes” provided in. SEC. 101. [42 U.S.C. 12511]</p> <p>Treated: Removal of invasive species, planting native plants, building riparian buffers, clearing of natural debris (such as fallen trees/limbs, hazardous fuel) and unnatural debris (such as disaster debris and improperly disposed waste). Treatment must go beyond basic trash removal.</p>
How to Measure/Collect Data	Tracking mechanism that ensures an unduplicated count of acres of land that have received services

EN4.1 (outcome)	Number of acres of public parks or other public and tribal lands that are improved
Definition of Key Terms	<p>Acres of public parks or other public and tribal lands: those reported in EN4</p> <p>Improved: Renovated to reduce human impact or the negative impact of natural disasters or invasive species, restored native plants and habitat, reduced erosion, protected watersheds, reduced wildfire risk, upgraded or repaired outdoor recreation facilities or signage, increased public safe access, protected flora and fauna. Improvement should be consistent with an accepted natural resource restoration, maintenance or improvement plan.</p>
How to Measure/Collect Data	Land manager assessment or other instrument capable of measuring changes in land condition at the scale of individual acres. When possible, pre-post assessments should be utilized.

EN5 (output)	Number of miles of public trails or waterways that are treated and/or constructed
Definition of Key Terms	<p>Public trails or waterways: owned/maintained by national, state, county, city or tribal governments; nonprofits when for public use or the public good; and public easements</p> <p>Treated: Removal of invasive species, planting native plants, building riparian buffers, improving tread/corridor of existing trail or making changes to increase the trail lifespan, implementing safety measures, removal of unsafe trail structures, repair of damage caused by visitor use, changes to increase accessibility, clearing of natural debris (such as fallen trees/limbs and hazardous fuel) and unnatural debris (such as disaster debris and improperly disposed waste). Treatments must go beyond basic trash removal.</p> <p>Constructed: Activities designed to make trails newly available such as adding handicapped accessibility, building boardwalks, trail-blazing, converting a railroad bed to a trail, etc.</p>
How to Measure/Collect Data	Tracking mechanism that ensures an unduplicated count of miles of trail/waterway that have received services

EN5.1 (outcome)	Number of miles of public trails or waterways that are improved and/or put into use
Definition of Key Terms	<p>Miles of public trails or waterways: those reported in EN5</p> <p>Improved: Restored to reduce human impact or the negative impact of natural disasters or invasive species, restored native plants and habitat, reduced erosion, protected watersheds, increased safe condition or long-term sustainability of trails, increased accessibility, protected flora and fauna. Improvement should be consistent with an accepted natural resource restoration, maintenance or improvement plan.</p> <p>Put into use: Established safe and useable trails that are now available for public access</p>
How to Measure/Collect Data	Land manager assessment or other instrument capable of measuring changes in trail or waterway condition at the scale of individual miles. When possible, pre-post assessments should be utilized.
